November 2026

1

A remarkable year of results

First, we give all glory to God for the remarkable performance recorded by our November 2026 candidates in the Nursing and Midwifery Council of Nigeria (NMCN) examinations.

Following our internal performance review, we recorded a 98.6% pass rate among our registered November candidates, with more than 5,000 successful candidates. Our private-class programme also recorded over 1,000 successful candidates.

INDICATOR, NOVEMBER 2026	RESULT
Pass rate among registered candidates	**98.6%**
Successful candidates	**5,000+**
Successful private-class candidates	**1,000+**
Partner institutions with 100% success among participating candidates	**Several**

Source: Academic Nightingale internal performance review (see Section 3).

These results represent thousands of candidates who prepared through Academic Nightingale's tutorials, structured learning programmes, curriculum-based mock examinations and academic resources.

2

Our impact across institutions

Our contribution to nursing examination success has extended beyond individual candidates.

Several schools and nursing institutions have partnered with Academic Nightingale and registered their students through our academic programmes. We are proud that a number of these partner institutions have recorded 100% success rates among their participating candidates.

We also celebrate our Post-Basic Nursing candidates across different specialities, including Public Health and Paediatric Nursing, with particularly remarkable results from our Post-Basic candidates at Aminu Kano Teaching Hospital.

> These achievements reinforce the value of structured preparation, consistent academic engagement and accessible learning resources.

3

Our performance assessment

Our November performance report was informed by multiple sources of evidence, including:

1. CBT server participation and performance records.
2. Private-class registration and academic records.
3. Result-confirmation polls conducted through our public WhatsApp channel.
4. Reports from Post-Basic candidates and partner institutions.
5. Candidate testimonials and public feedback across TikTok, X and other platforms.

These sources formed the basis of our internal review and performance assessment.

4

The national 100% agenda

The ambition to achieve 100% success in the national NMCN examinations has always been part of Academic Nightingale's mission.

We have witnessed remarkable results among candidates who prepared with us. We have also seen partner institutions record 100% success among their participating students. However, our ambition extends beyond our registered candidates and partner institutions.

The November 2026 national General Nursing examination recorded an overall pass rate of 87.88%. We celebrate the progress made, but we recognise the work that remains.

PASS RATE, NOVEMBER 2026	RATE
Academic Nightingale registered candidates	**98.6%**
National General Nursing examination, all candidates	**87.88%**
Our target for the nation	**100%**

> Our next objective is to take this impact nationwide.

5

2027: Taking the impact nationwide

In 2027, the national 100% NMCN examination success agenda will be our central focus. We want to reach more nursing students, graduates, schools and institutions across Nigeria.

To make this possible, we have commenced internal arrangements to expand our institutional engagement and accommodate nursing schools across the country.

We are working towards a more inclusive structure that will enable institutions to register their students, access our academic resources and benefit from organised examination preparation and support.

> This is not a one-institution or one-person responsibility. Achieving a 100% national pass rate requires collective commitment from schools, educators, students, academic organisations and other stakeholders in nursing education.

Together, we can make a greater impact. Together, we can win.

6

2027 registration announcement

REGISTRATION OPENS

1 December 2026

Registration for the 2027 Academic Nightingale programmes will officially open on 1 December 2026. This includes:

- 2027 CBT programmes.
- 2027 Private Class programmes.
- Institutional and school registration arrangements.

Schools and nursing institutions are encouraged to begin making preparations for the registration of their students.

7

Learning access remains open

Our commitment to accessible nursing education continues. Candidates can already benefit from our:

- Free daily tutorials through our official WhatsApp channels.
- Free nursing textbooks and learning materials.
- Academic discussions and examination guidance.
- Accessible learning resources designed to strengthen examination preparation.

We encourage nursing students and graduates preparing for their examinations to join our official WhatsApp channels, take advantage of these free resources and share them with colleagues.

8

The journey ahead

We have seen what is possible among individual candidates. We have witnessed the success of our partner institutions. We have recorded the impact of structured academic preparation.

Now, we are preparing to take that impact to a national scale.

The work has started. The arrangements are underway. The next phase is approaching.

2026	Proof of impact.
2027	Taking the impact nationwide.
Our target	100% national NMCN examination success.
